Über die Messe

In recent years, the movement of the "Fourth Industrial Revolution", which realise a great change of the industrial structure of the manufacturing industry, has become active. In Fourth Industrial Revolution, we are aiming to achieve "Energy Conservation/Promotion of Labor Saving", "Cost Reduction", "Shortening Development and Manufacturing Period", by actively utilizing AI and IoT technologies. Based on this background, Show Management decides to launch this exhibition gathering together with solutions related to "AI" and "IoT" technologies for manufacturing industry.
