##### About the expo

The fair consists of a field area for companies that do not require a forest setting to exhibit their machines in operation, plus a two-kilometre-long demo trail where exhibitors can demonstrate felling operations using skidders, harvesters, forwarders and cableways. Forest Romania is the first demofair for Forestry in Romania. It is an open-air fair and has an exhibition space with diverse structure that combines exhibition stands on the lawn with a demo trail where exhibitors can demonstrate felling operations using skidders, harvesters, forwarders and cableways. During this international exhibition a wide range of forest machines, forestry technology, equipment for bioenergy production, for nurseries, for planting, hand tools and outdoor equipment, timber transport vehicles and other carriers is presented.
